

# CHARL BESTER

SOFTWARE ENGINEER

---

**Dear Sir or Madam:**

I want to express my interest in applying for the position of **junior software engineer** as currently available within your organisation.

My experience resonates with my ability to design and test code for various functions to meet client needs. Furthermore, I am well adept at monitoring the technical performance of internal systems and writing reports conducting development tests as requested.

Following are further highlights of my qualifications and professional achievements:

- **Bachelor of Computing Honours specialising in Software Engineering - currently completing my final year.**
- **One of a few students from Belgium Campus chosen to collaborate with Pennsylvania University to develop a virtual concept as a final solution for the agricultural engineering sector, i.e. implementing technology in hydroponics in vertical farming to make it more efficient.**
- **Skilled in varies of technologies, including Microsoft SQL Server, .NET Development, Angular, etc.**
- **Monitoring the technical performance of internal systems.**
- **Writing reports and conducting development tests as requested.**

I am passionate about designing quality software and adept at working in both team and self-directed settings to drive product success and process efficiency.

I am currently seeking to pursue an opportunity with a reputable organisation that will enable me to utilise and enhance my software development knowledge while providing opportunities for personal and career growth.

Thank you for your consideration.

Sincerely,

Charl Bester
